

SİMAY KİMYA LTD. ŞTİ

PLASCOL

PLASCOL is a cold water starch derivative, it is applicable to DRY MORTARS

Features

Pale yellow - white powder,

Moisture : 9 – 9,5 %

pH value (1 %cnc.) : app. 8,5

Bulk Density : about 600 kg / cubic meter

Viscosity : 650 – 800 cps

Other Features

PLASCOL must be used in combination with other cellulose derivatives to

- Improve sag resistance
- Improve open time and workability
- Totally ecological and environmentally friendly, natural product
- Good compability with many cellulose derivatives
- Biologically degradable
- Shelf time 2 years under dry storage conditions after production date
