TILESET 70

TILESET 70 is a cold water starch derivative, it is applicable to TILE ADHESIVES and DRY MORTARS

Features

Pale yellow-white powder,

Moisture

: 9-9.5 %

pH value (1% conc.)

: app.8,5

Bulk Density

: about 570 kg/cubic meter

Viscosity

: 650 -720 cps

Other Features

TILESET 70 must be used in combination with other cellulose derivatives to

- Improve sag resistance
- Improve open time and workability
- Totally ecological and environmentally friendly, natural product
- Good compability with many cellulose derivatives
- Biologically degradable

Shelf time 2 years under dry storage conditions after production date
